SUMMARY

To apply my skills in instrumentation and embedded systems to create smart solutions, improve processes, and work on innovative projects. Looking for opportunities in a learning-focused and growth-oriented environment.

EDUCATION

Bachelor's Degree in Electronics and Instrumentation	2022 - Present
Velammal Engineering College CGPA: 9.08 (Upto 4th semester)	
HSLC	2022
CSI Ewart Mat. Hr. Sec. School 91.2%	
SSLC	2020
CSI Ewart Mat. Hr. Sec. School 81.8%	

INTERNSHIPS

Toshniwal Hyvac Pvt. Ltd.	Nov 24 - Dec 24
• Gained hands-on experience in the design, operation, calibration, and testing of flow meters, including principles like positive displacement and electromagnetic flow measurement. • Learned about sensor integration, signal conditioning, and error minimization techniques. • Contributed to a real-time stepper motor control system, strengthening embedded system skills.	
DLK Career Development	Jun 24
• Gained hands-on experience in Arduino programming, sensor integration, and project development. • Worked on Arduino IDE and Proteus 8 Professional to simulate and implement real-world applications.	

TECHNICAL SKILLS

- **Embedded Systems:** Arduino, Raspberry Pi
- **Programming Languages:** Python, C
- **Frontend Web Development:** HTML, CSS
- **Software tools:** MATLAB, Proteus, LabVIEW

SUBJECT OF INTEREST

- Transducers Engineering
- Industrial Instrumentation
- Programmable Logic Controller

EXTRA CURRICULAR

- **ISA Student Member , International Society of Automation**
Velammal Engineering College

PROJECTS

Virtual Telepresence Robot using Raspberry Pi

- Built a Raspberry Pi-powered robot with remote navigation and live video streaming via a web interface. Enabled real-time monitoring using RPi camera and motor driver.
- **Tools used** :Raspberry Pi 3, Arduino, RPi camera module

Reader's Corner- A survey form

- Created an interactive frontend website to collect reader preferences with input validation and a user-friendly design.
- **Tools used** :HTML5/CSS3

Cozy Cafe - Landing Page

- Built a responsive website with sections for landing page, menu, hours, and contact. Ensured visual consistency and smooth navigation.
- **Tools used**: HTML5, CSS3

Closed Loop Stepper Motor Control

- Designed and implemented a closed-loop system using a stepper motor and shaft encoder to display real-time RPM and pulses, ensuring precise speed control as a part of my internship experience
- **Tools used**: Arduino, LCD, Proteus, Shaft Encoder

CERTIFICATIONS

- | | |
|--|---|
| • Introduction to Internet of things
NPTEL - issued May 2025 | • Introduction to IoT
Simplilearn - issued Mar 2024 |
| • Python
GUVI , IITM research Park - issued Oct 2024 | • Basic Electronics Course
Cursa - issued Jun 2023 |
| • Responsive Web Design
freeCodeCamp -issued Jul 2024 | • Problem solving through programming in C
NPTEL - issued Apr 2023 |
| • Raspberry Pi for beginners
Udemy -issued Apr 2024 | • Internet of things
Novitech R&D Private Limited - Issued Jan 2023 |

CO-CURRICULAR

- Attended a technical workshop on **Introduction to P&ID and ISA standards**.
Velammal Engineering College - Issued Jan 2025
- Attended an online 2 hours bootcamp on **AI-Powered IoT (virtual)**
Novitech R&D Private Limited - Issued Oct 2024
- Attended an online workshop **Embedded Systems**
Ezone Electronics - Issued Oct 2024
- Attended an online 2 hours bootcamp on **Artificial Intelligence (virtual)**
Novitech R&D Private Limited - Issued Oct 2024
- Participated in a **project expo** at Sri Sairam Institute of Technology.
Issued Sep 2024
- Presented a paper at a **paper presentation** event at SIMATS College.
Issued Aug 2024
- Participated in **Velammal Hackathon 1.0** at Velammal Engineering College.
Issued Apr 2024
- Completed a 15-day virtual internship on "ROBOTICS" conducted by KODACY.
Issued Dec 2023
- Participated in **CODEATHON 2K23** preliminary round (virtual).
Issued Aug 2023
